

ACADEMIC NETWORK PRICING LETTER OF UNDERSTANDING

Wolverine is pleased to offer you deeply discounted academic network pricing for our commercial-grade software products, **GPSS/H**, **SLX**, and **Proof Animation**.

In order to be fair to our commercial customers who pay full price for the same products, we must require you to sign the following statement limiting your use. The intention is to prohibit all use that falls outside the domain of normal academic research and teaching activities.

By signing this statement, you promise to abide by the conditions set forth below, which are additions to the “shrink-wrap” license to which you must agree during installation of the software.

Primary Use

“We agree that the primary use of the above products is for research and teaching. We agree to make our best effort to assure that the above products are not directly used by commercial organizations.”

Academic Consulting Use

“The use of any of the above products for revenue-generating consulting or applied research will be conducted under the name a faculty/staff member of our academic institution or the name of our institution itself. Businesses operating under business names (whether or not in full or part comprised of faculty, staff, and/or students of our academic institution) must pay full commercial prices for software licenses from Wolverine. Such use is expressly forbidden under this Letter. We take responsibility for informing Wolverine if any of its software licensed under an Academic Network License is or becomes used for consulting purposes by any business or by any person operating under a business name.”

Limitations on Consulting Use

“At most a total of 500 hours of billable consulting work may be performed using software licensed under an Academic Network License by any combination of university employees, students, or other individuals during any 12 month period. We take responsibility for informing Wolverine if the software identified below is used for consulting in excess of this limit.”

Transfer of Software and Materials Not Permitted

“Finally, we agree that under no circumstances will any documentation or copies of documentation, software or copies of software, or other materials provided by Wolverine under academic pricing, be transferred, formally or informally, permanently or temporarily, to any other party, commercial, government, or otherwise.”

Responsibility for Additional Payment

“If any of the above three limitations is ever exceeded, we will use our best efforts to see that Wolverine receives fair payment up to the then-current price of the equivalent commercial software license.”
